

**FITTING INSTRUCTIONS FOR CP0241BL CRASH PROTECTORS  
KTM 690 ENDURO 2008**

TOWARDS REAR  
OF BIKE

TOWARDS FRONT  
OF BIKE

**Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike**

Please note that in cases where kits are packed with rubber washers holding the components onto the bolt – *the rubber washers should be thrown away!*

**You will need the following tools to complete this job.**

**Socket set to include 17mm A/F socket, a T45 torx bit and wrench.  
Torque wrench to be used at 40NM.**

#### Left-hand side (as you sit on bike)

- Remove frame bolt in position arrowed top left using T45 torx bit and wrench.
- Place washer and shake-proof washer from kit onto the M10x1.5 pitch x 90mm long hex head bolt from kit (ensure plain washer is against bolt head and shake-proof washer will be against bobbin face on assembly), fit through bobbin so bolt head goes into counter-bore.
- Place spacer from kit onto exposed end of bolt with smaller diameter facing away from bobbin (so spacer fits between bobbin and frame and small diameter fits into frame recess).
- Offer this assembly up to frame mount and tighten bolt until you feel some compression from inside the protector using 17mm socket and wrench. **PLEASE NOTE BOBBIN MUST BE POSITIONED AS PICTURED ABOVE WITH BIGGER END TOWARD FRONT OF BIKE.** Turn a little more so that you feel the compression increase slightly. Then apply a quarter turn. Do not overtighten as damage can occur to the bike. Do not exceed 40nm of torque.

#### Right-hand side (as you sit on bike)

- Remove frame bolt in position arrowed top right using T45 torx bit and wrench.
- Place washer and shake-proof washer from kit onto the M10x1.5 pitch x 90mm long hex head bolt from kit (ensure plain washer is against bolt head and shake-proof washer will be against bobbin face on assembly), fit through bobbin so bolt head goes into counter-bore.
- Place spacer from kit onto exposed end of bolt with smaller diameter facing away from bobbin (so spacer fits between bobbin and frame and small diameter fits into frame recess).
- Offer this assembly up to frame mount and tighten bolt until you feel some compression from inside the protector using 17mm socket and wrench. **PLEASE NOTE BOBBIN MUST BE POSITIONED AS PICTURED ABOVE WITH BIGGER END TOWARD FRONT OF BIKE.** Turn a little more so that you feel the compression increase slightly. Then apply a quarter turn. Do not overtighten as damage can occur to the bike. Do not exceed 40nm of torque.

#### CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

#### R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorized (if not pre-authorized the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

**FRANCE**  
**INSTRUCTIONS DE MONTAGE DES PROTECTIONS**  
**CP0241BL KTM 690 ENDURO 2008**

**LA PRESENTATION DES PIECES R&G DANS L'EMBALLAGE N'EST PAS TOUJOURS IDENTIQUE AU SENS DE MONTAGE.**

**Merci de noter que dans le cas où les protections sont assemblées avec une bague en caoutchouc, merci de bien vouloir le retirer lors du montage des pièces sur la moto.**

**Outils nécessaires.**

**Clé de 17mm, une clé Torx T45.**

**Clé dynamométrique 40NM.**

**GAUCHE**

- Enlever la vis de fixation moteur. (voir photo en haut à gauche) utilise la clé T45 torx.
- Glisser une rondelle lisse puis une rondelle crantée sur la vis M10 x 90 mm.
- Glisser le tout à travers un tampons R&G.
- Glisser une entretoise sur la protection, (le coté de l'entretoise la plus petite sera positionnée vers l'extérieur du tampon)
- Placer le tout sur la moto.
- A l'aide d'une clé de 17 mm, serrer la vis jusqu'à ce que vous sentiez la compression à l'intérieur du tampon, Faire encore un quart de tours.
- Ne pas trop serrer, couple de serrage Maxi 40nm
- Attention au sens de montage de la protection (le côté le plus large positionné vers l'avant de la moto).
- Clipper le cache R&G dans le tampon

**DROITE**

- Enlever la vis de fixation moteur. (voir photo en haut à gauche) utilise la clé T45 torx.
- Glisser une rondelle lisse puis une rondelle crantée sur la vis M10 x 90 mm.
- Glisser le tout à travers un tampons R&G.
- Glisser une entretoise sur la protection, (le coté de l'entretoise la plus petite sera positionnée vers l'extérieur du tampon)
- Placer le tout sur la moto.
- A l'aide d'une clé de 17 mm, serrer la vis jusqu'à ce que vous sentiez la compression à l'intérieur du tampon, Faire encore un quart de tours.
- Ne pas trop serrer, couple de serrage Maxi 40nm
- Attention au sens de montage de la protection (le côté le plus large positionné vers l'avant de la moto).
- Clipper le cache R&G dans le tampon
